**GALVANISED & STAINLESS STEEL
 FITTINGS & COUPLINGS**

Galvanised and Stainless Steel Fittings

Flanged Hoesetails

Flanged hoesetails, available in 2" to 12" ex stock items. Some reducers are made to measure. These flanged hoesetails are available galvanised or stainless steel. Flange types D, E, ANSI (fixed and loose).

Footvalves & Strainers

Quality footvalves available in sizes 3" to 18". Strainers from 3" to 20". Quick release footvalves make the job easier. A range of flanged and hose tail strainers available, as standard units or custom fabricated.

Med. Wall Tees, Bends, Tapers

A range of Tees, Bends and Tapers available ex stock item to suit most water transfer applications. Many custom configurations possible. See our price catalogue for standard stock items.

Hose Fittings

Specifically designed hose fittings for drag or layflat irrigation hose. Use on soft hose irrigation systems, and connection hoses for hard hose irrigators and mobile pump units.

Bends

Perfect for hydrant connection points on pivots and laterals. Any combination can be made specifically to your design.

Weld Bells & Male Ring Lock Fittings

Great for connection points for hard hose, soft hose, laterals and pivots. Use as connection points on vacuum trucks.

Fabrication of Custom and Made to Order Fittings

Many of our standard stock items consist of bends, tees, flanged hoesetails, concentric tapers, and many more. We ensure we keep a supply of weld on parts that can be quickly fabricated and galvanised for non-stocked sizes. We also stock stainless steel parts that can be fabricated into the custom part you require. Sometimes just the weld on is all you need. We sell these direct from our warehouse.

Only Available from IB INTERNATIONAL
